

File Edit View Run Kernel Settings Help

         Code 

```
[2]: type(1)
```

```
[2]: list
```

```
[3]: l.append(80)
```

```
[4]: 1
```

```
[4]: ['String', 1, 34.5, False, 80]
```

```
[5]: t = ("String", 1, 34.5 , False )
```

```
[6]: type(t)
```

```
[6]: tuple
```

lists follows the order , whereas in sets order is not considered sets { } set has u

```
[7]: name = "google"
```

```
[8]: name
```

```
[8]: 'google'
```

```
[9]: type(name)
```
